CAREER OBJECTIVE

Junior Full Stack Web Developer with experience developing sites with responsive design and smooth user interfaces while utilizing modern frameworks and best practices.

PROJECTS

Personal Portfolio & Javascript Syntax Highlighter

- Simulated a Windows 10 GUI which has various links to projects, including a draggable notepad window
- Opening the notepad and typing will show my resume which utilizes a syntax highlighter library that I created

Code Clicker (Beta) – Android – XML/Java – 2014 & Current

Project Lead/Developer

- Integrated in Google Ads into the application to create revenue for idle play
- Utilized Object Oriented Programming and Top Down Development to create a full backend in Java
- Older project that began in 2014 and that is now being ported for web and has since been removed from the Play Store

Food & Recipe Application – Windows 8 Store App - 2014

Junior Developer

- Mentorship project where two mentors who were in industry (FAANG) served to guide me through test driven development (TDD) as well as Do Not Repeat Yourself (DRY) code.
- Implemented an external library which used parsers and HTML Agility Path/Xpath to retrieve information and store it internally from recipe websites.

EXPERIENCE

WEDDING PHOTOGRAPHER

You Kai Creations, Houston, TX / Apr 2016 - Present

- Utilized photoshop and lightroom to provide quality photography products and services to my clients
- Managed a website that was hosted with GoDaddy through cPanel and deployed various versions of websites that were both self made and with WordPress.
- Actively searched for and solved problems or sought out independent learning for wedding photography through Google
